

# Authoring Tutorial

## Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

## Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed). `## Rendering pdf rendering from the Terminal fails though it succeeds when running if from the Console with`

```
echo: false
quarto::quarto_render("AuthoringTut.qmd", output_format = "pdf")
```
