

Authoring Tutorial

Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).

Rendering

pdf rendering from the Terminal fails though it succeeds when running if from the Console with

```
echo: false
quarto::quarto_render("AuthoringTut.qmd", output_format = "pdf")
```

```
```{r fenced code}  
1 + 1
```
```

[1] 2

```
```{r not executed}  
1+1
```
```
